How do I remove pledges from the thermometer?

You may need to remove an individual pledge from your thermometer or clear out a number of test pledges after testing at your venue.

To clear out your thermometer:

1. Click **Existing Reporting** > **Manage Pledges**.
2. Filter, likely by **Keyword**.
3. Find the pledge you want to remove.
4. Click **Mark as Test**.
5. That pledge will be completely removed from the thermometer and all your totals immediately.

> **NOTE**: If a donation has been collected the mark as test button will not appear. If you need to remove a collected donation, follow these instructions to move it off of your keyword and onto another in your account so that it is no longer publicly visible:
