

# How will I know when my mobile validation list has uploaded?

Last Modified on 06/02/2022 11:15 am PDT

After uploading your list from **Communication & Marketing > Manage Lists > +New List** you can **refresh the active list screen** to see how many numbers have been verified.

Your list is almost done!

Your list has been uploaded and it's processing in the background. It might take a few minutes, so we will email you when it is ready.

Usually this process only takes a few minutes. If you have a large list, or if your list has many fields, the upload process will be slower. You do not need to stay on this page, though. You will be emailed when the list has been processed.

**Your List has been uploaded!**

Click [here](#) to send them a quick message about the work you're doing and offer them a chance to help out.

When the verification process is complete, you will receive this email notification with a link to see the results of the upload and verification.
