

How do I embed my Website Donation Form?

Last Modified on 09/25/2023 12:23 pm PDT

Your organization can create Website Donation forms for your website as well as for specific campaigns. Each form can be embedded on a webpage or linked to as a free-standing donation page. The main one is created as a Website Donation Form. Others are created as Text to Donate forms.

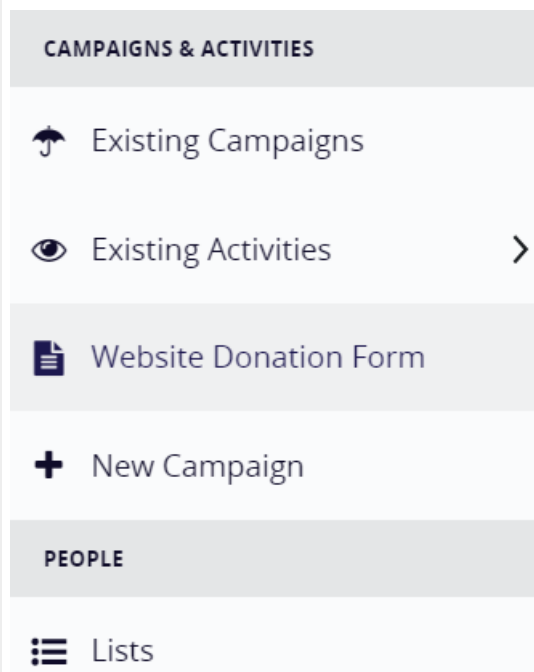

Note: *It is highly recommended that you use a secure webpage (SSL or https://) for your donation form.* If you put the donation form on an insecure site, your supporters may suspect that it is not a legitimate page. While the form itself IS secure, embedding it in an insecure page will make it appear to be insecure.

Talk with your webmaster about getting SSL on your webpage.

If you cannot get SSL or while it is in the works, it is recommended to simply link out to your GiveSmart Fundraise form instead of embedding it.

To set up your Website Donation Form:

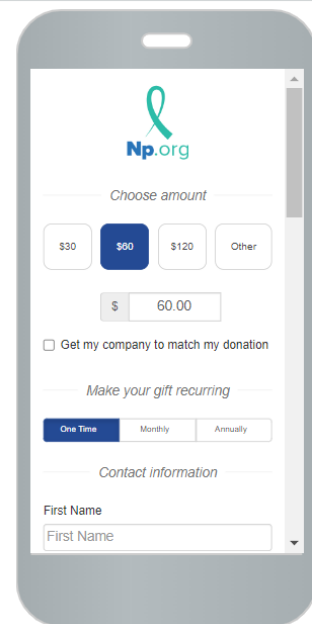

Click **Website Donation Form**

Customize your fundraising form and click **Save**.

Payment Type ▼

- Logo and Branding
- Suggested Amounts
- Matching Donations
- Recurring Donations
- Contact Information
- Payment Information
- Promotional Codes
- Footer Message
- Form Submit
- Receipts and Notifications
- Embed Code

Promote this link on your website and by email, social media, and text.
 Secure Link: <https://fundraise.givesmart.com/form/b-izpw>

Option #1: If you DO NOT have a secure (SSL) and mobile responsive website

Find the Secure Link at the bottom of the form builder, beneath the Save button. You can copy this link and direct the "Donate" button on your website to link to this address.

Receipts and Notifications

Embed Code

Promote this link on your website and by email, social media, and text.
 Secure Link: <https://fundraise.givesmart.com/form/b-izpw>

Option: This link can be shared directly to promote your online giving campaign.

Option #2: If you DO have a secure (SSL) and mobile responsive website

Cut and Paste embed code into the HTML of a page on your website.

We highly recommend our users with **responsive** websites to change the **width** of the iFrame to **"100%"** so that the frame will resize with different phone screens.

Embed Code

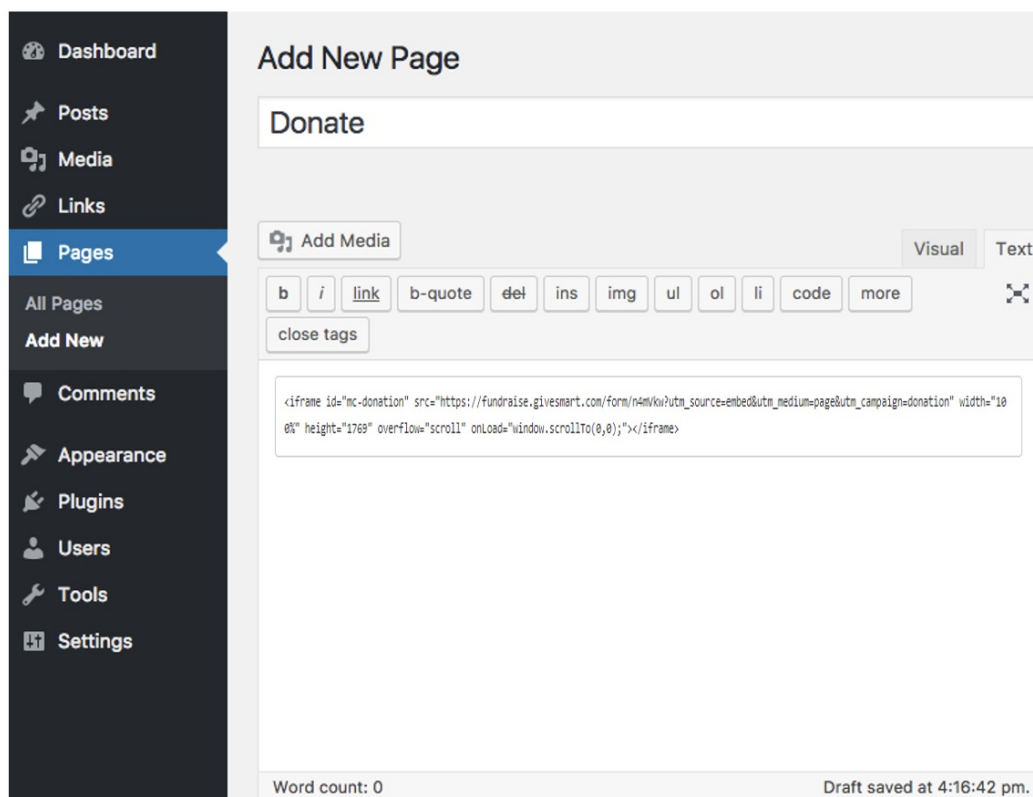

Form Embed

Embed this code to place a secure form on your web site 

```
<iframe id="mc-donation" src="https://fundraise.givesmart.com/form/b-izpw?utm_source=embed&utm_medium=page&utm_campaign=general" width="100%" height="1746" overflow="scroll" onLoad="window.scrollTo(0,0);"></iframe>
```

To change the size of this online form, edit the height and width dimensions within the Embed Code.

Example WordPress HTML editor

The screenshot shows the WordPress 'Add New Page' editor interface. The left sidebar contains navigation options: Dashboard, Posts, Media, Links, Pages (selected), All Pages, Add New, Comments, Appearance, Plugins, Users, Tools, and Settings. The main content area is titled 'Add New Page' and has a title field containing 'Donate'. Below the title field is an 'Add Media' button and two tabs: 'Visual' and 'Text'. The 'Text' tab is active, showing a rich text editor toolbar with buttons for bold (b), italic (i), link, b-quote, del, ins, img, ul, ol, li, code, and more. A 'close tags' button is also visible. The main text area contains the following HTML code for an embedded form:

```
<iframe id="mc-donation" src="https://fundraise.givesmart.com/form/n4mki?utm_source=embed&utm_medium=page&utm_campaign=donation" width="100%" height="1769" overflow="scroll" onLoad="window.scrollTo(0,0);"></iframe>
```

At the bottom of the editor, it shows 'Word count: 0' and 'Draft saved at 4:16:42 pm.'

Embed a different donation page: You can replace the **src=** link in the code to embed any donation page from your GiveSmart Fundraise account.

Embed this code to place a secure form on your web site 

```
<iframe id="mc-donation" src="https://fundraise.givesmart.com/form/b-izpw?utm_source=emb  
ed&utm_medium=page&utm_campaign=general" width="100%" height="1746" overflow="scroll" on  
Load="window.scrollTo(0,0);"></iframe>
```

Note: Every website is a little different. You will need to work with your webmaster to correct any spacing issues on the page of your embedded donation form.
