

Can I transfer Recurring Donations from a different platform to my GiveSmart Merchant Account?

Last Modified on 07/28/2025 11:29 am PDT

For security and compliance reasons, GiveSmart Fundraise does not transfer, store, or retain complete credit card information.

To transfer previous recurring donations from a different platform over to GiveSmart Fundraise, each donation would need to be manually set up by initiating a new recurring donation through a GiveSmart Fundraise form.

This ensures that their recurring payment information will be securely tokenized and stored with the payment processor, Fiserv (formerly CardConnect), allowing future installments to be billed at the recurring frequency selected.

The support guide below details how to locate the public link to your form, which you can provide to donors to set up their **recurring gifts** through GiveSmart Fundraise.

Where can I find the Public Link to my Donation Form?
