

GiveSmart Fundraise API Documentation and Keys

Last Modified on 10/02/2024 7:09 am PDT

If you're connecting GiveSmart Fundraise to a supported 3rd party application, an API key may be required. This article details how to retrieve your private API key from your GiveSmart Fundraise account.

NOTE: Only users with Admin privileges in GiveSmart Fundraise will have access to the Developer Portal to be able to view the API documentation or generate the API key. If you don't have access to the portal below, contact an Administrator in your account to grant you the proper privileges.

Generate or retrieve your API Private Key

In the upper right near your profile name, click the question mark.

Select Knowledge Center.

Select API Documentation.

Click on Developer Home.

Click **Generate Private Key**. If a key has already been generated, it will be displayed.

Highlight the private key and document it as necessary. Select API Documentation for details on composing API calls.
