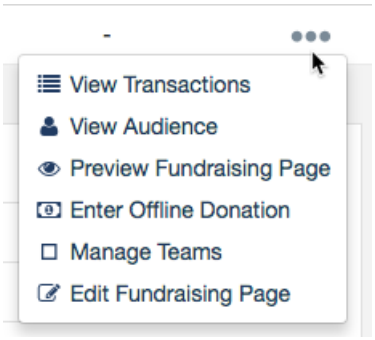
Campaign Activity Actions

Last Modified on 09/21/2023 12:20 pm PDT

From within your Campaign, by clicking on your Campaign tile, you can view all activities and forms within the campaign.

Interaction through Action Menus

The Action Menus are context sensitive, so you will have different options available depending on activity and form types.

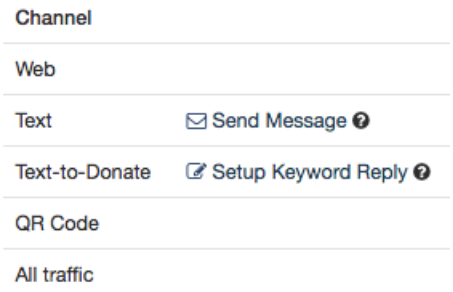


If you want to run a report on the Activity or form, you can do so directly, by choosing**View Transactions**.

If you want to see a list of constituents who have texted the Keyword, choose**View Audience**.

Otherwise, depending on the type, you will be able to edit the Keyword/Setup information, **Preview** forms, **Edit** forms and interact with the forms, like entering an Offline Donation.

Interacting through the Form View



This functionality is available if you have the Advanced package.

If you want to send a text message using the Enhanced Text Messaging special link to get analytics, you can click on **Send Message** to immediately initiate a text Message that will populate the Campaign and the trackable link.

To see the Activity's Mobile Experience and change which form you want the Keyword to link to, you can click on **Setup Keyword Reply**.
