

How do I edit my social share setting for donation pages and online forms?

Last Modified on 09/07/2023 11:27 am PDT

1. Go to: <https://developers.facebook.com/tools/debug/>

2. Cut and paste your page URL (e.g. <https://fundraise.givesmart.com/e/dGHnpQ>) and click **Debug**.
3. If a logo is not appearing correctly try uploading a 500x500 logo to your form. (You can hide it if you like and add the exact logo using a custom image in a custom field.)
4. The Facebook share title and description defaults to your **Campaign** name and description.
 - The Description can be changed within the **Social Media Settings** of the activity, but the name/title will stay as the Campaign name.
5. You can edit these settings inside the Campaign:
 - Click the **Settings** icon on the **Campaign tile**
 - In **Settings** within the campaign, open the **Properties** section
 - Edit the Campaign Name and Description

6. After you have updated the image, campaign title, and campaign description you can "fetch new information" using the Facebook debugger tool.
7. You should see the preview of your share settings appear. If it is not correct follow the steps above again to edit.
