Card on File

> Note: This feature is only available on your Ticketing activity. If you are not using the Ticketing functionality of GiveSmart Fundraise, this will not work.

Enable your donors to provide a credit card when they check-in through the **Ticketing activity** and continue to use their **Card on File** without bringing it out again, throughout the event, to create a frictionless giving experience at events .

You will need to enable the feature by first going into your Campaign Settings. From the dashboard, either click on the gear icon on the campaign with your ticketing activity or click into the campaign and select the **Settings** category.

Select the Properties section. There will be an option to **Save guest payment info on file** .

Enable this switch.

Properties

Campaign Name

A Toast to the Future

Campaign Type

Dinner Galas/Luncheons

Campaign Description

Participate in the next big thing!

Save guest payment info on file   Enable

Now when you **Check in** ticketed people at your event, after you have scanned their ticket or verified their ticket and checked them in, you will be given the option to **Add Guest Credit Card**.

Success!

Scott Couchman's ticket has been checked-in.

+ Add Guest Credit Card

Undo   Ok, got it

Enter the guest's details and it will keep those details on file.

You're All Set

Credit card info has been updated successfully

Ok, got it

Notes:

- The guest's information will be available only for the next 24 hours.
- If the Credit Card was entered incorrectly, the guest will need to be undone, then checked in again to correct the mistake. See the **Manage Guests** article for more

The guest will receive a text message with their code.

Thanks for supporting MCAcademy. Your one time code (valid only for the next 24 hrs): 6697. Do not share it with anyone else.

When they then text in a Keyword to donate or purchase anything and follow the link, they will be asked for their code.

Enter Your Code

We sent a four-digit code to 626.555.9046

Send me a new code

Let's skip this step

When they enter the code, the payment section of the payment form will be hidden and that stored information will be used.

Pay with my card ending in **1111**
