

Reset Fundraising Thermometer

Last Modified on 09/25/2023 10:47 am PDT

As a best practice, you've tested your Fundraising Thermometer to make sure it works as expected. You have also tested it at your event to make sure the cell coverage is good and everything will go perfectly. Or you've used the existing thermometer before, and just want to start fresh. How do you reset the thermometer?

1. Go into your **Activity**
2. Go into the **Fundraising Thermometer** (from the categories on the left)

Keyword

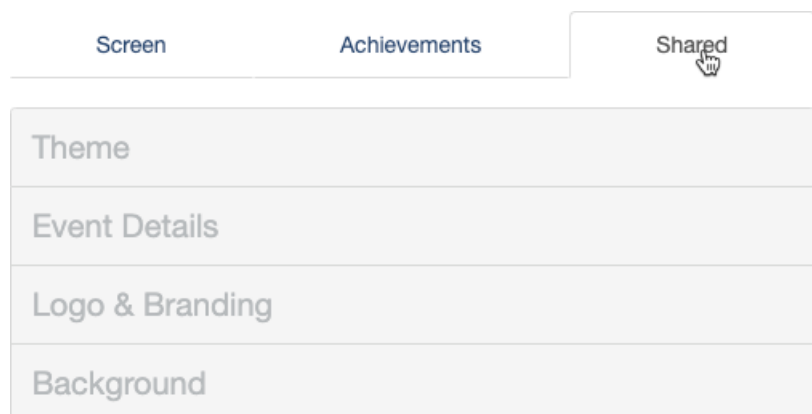

Online Forms

Mobile Experience

Fulfillment

Fundraising Thermometer

3. Go to the **Shared** Tab in the Thermometer designer (on the right)

Clear Thermometer Undo

Clear Pledges, Donations, and Donor information from the thermometer screen. **Thermometer settings will not be changed.**

4. Click **Clear Thermometer**

Clear Thermometer Undo

Clear Pledges, Donations, and Donor information from the thermometer screen. **Thermometer settings will not be changed.**

5. Select **OK** to complete the clearing of the thermometer.

When you do this, it will only clear the *displayed* donor wall and the amounts. Any pledged or fulfilled donations will not be touched in your GiveSmart Fundraise Account.

Also, it will retain the design of your thermometer, only the displayed data will be cleared.

If you cleared the Fundraising Thermometer in error, you can also select **Undo** to revert to showing your previous donors.
