

How can I add automatic Address Lookups?

Last Modified on 05/20/2022 6:17 pm PDT

When your supporter starts filling out their street address, the form will automatically start to suggest an address to make entering that information that much faster and easier for your supporters. When you select an address, it will populate the Address, City, State, and Zip.

This feature is automatically enabled on activities created in or after February 2020. If you have an activity created before this time, then it may be disabled, so the function of the form is as you knew it when you created it. You can still enable this feature on previously created activities, though as outlined below.

Contact information

First Name *	Last Name *
<input type="text" value="First Name"/>	<input type="text" value="Last Name"/>
Mobile Number *	Email *
<input type="text" value="Mobile xxx-xxx-xxxx"/>	<input type="text" value="name@example.com"/>
Address	
<input type="text" value="123 Address Blvd"/>	
City	
<input type="text" value="Your City"/>	
State	Zip *
<input type="text" value="Your State"/>	<input type="text" value="12345"/>

Go into the activity you wish to enable the Address Lookup feature.

Go to the **Online Form** category in the right and open the **Contact Information** section of the appropriate form.
